

Basic Protocols for Symptoms of the Injection or Transmissions from The Injected

Note: 1. These protocols are developing as our knowledge about the Injections increase. Please check back for updates. **2.** Some individuals, usually immune-compromised people, respond better to herbs rather than the potencies (energies) of the Hx. Herbs and vitamins are definitely valuable. **3.** People who are highly reactive to substances – lots of food intolerances, sensitivities, etc – do very well on the high homeopathic potencies. **4.** These protocols are a guide for you in conjunction with your Homeopath and/or Doctor. **5.** If the Hx is dispensed in water: 1 dose – 10 drops otherwise 1 dose = 3 pills.

Note: December 2021: Causticum 200C and Mercurius corrosivus 200C and 1M are being added. Further notes coming as case studies are written up.

WEEK 1		
Day 1	Arnica 200C, 2-3 pillules/drops	For shock. Take immediately or ASAP.
	Thuja 1M	Within an hour of taking Arnica
Day 2	Tabacum 6C, 1 dose morning then night.	Helps to antidote graphene oxide.
Day 3	*Silicea 200C, 1 dose Optional extra: Silica 1M, 1 dose later in the day.	See End Note! Not for people with surgical pins/plates in the body as the action of Silicea 200C may/may not shift these but Silicea 1M will.
Day 4 to Day 7	Tabacum 6C for 1 or 2 doses each afternoon. Canabis sativa 12C will do the same.	Will help the body to make hydrogen peroxide to break down graphene oxide and methylate it out of the body.
	If there is nausea, especially nausea without vomiting, give Nux-vomica 1M instead of the scheduled Hx for the day. Can give Nux-vomica 1M as needed for nausea or head-ache.	
Day 4	Arsenicum album 200C, 1 dose morning	
Day 5	China officinalis 200C, 1 dose morning	
Day 6	Kali Iodatum 200C, 1 dose morning	
Day 7	Graphites 200C, 1 dose morning	
	NOTE: Graphites 200C can bring hard nodules out on the skin of some people as they eliminate toxins. Post Injection, these nodules have magnetism (you can stick fridge magnets onto them) and they will ooze the dark colored graphene	
WEEK 2 – Repeat WEEK 1		
WEEK 3		
Day 1	Nil Scheduled. Can take any of the ‘use as needed’	
Day 2	Zincum metallicum 200C or 1M, 1 dose	
Day 3 to Day 5	Nil	
Day 6	Phosphorus 200C or 1M, 1 dose	
Day 7	Nil	
WEEK 4		
Day 1	Phosphoricum Acidum 200C or 1 M, 1 dose	
Day 2	Nil	
Day 3	Nil	
Day 4	Mercurius Solubilis 1M, 1 dose	
Day 5 to Day 7	Nil	

WEEK 5 and WEEK 6		
Day 1	Nosode	
Day 2	Nil	
Day 3	Nil	
Day 4	Nosode	
Day 5	Nil	
Day 6	Nil	
Day 7	Nosode	
WEEK 6		
Day 1	Nil	
Day 2	Nil	
Day 3	Nosode	
Day 4	Nil	
Day 5	Nil	
Day 6	Nosode	
Day 7	Nil	
WEEK 7 - Repeat WEEK ONE		
WEEK 8 to WEEK 10		Repair Tissue / Cell Salts with Carbonates
Day 1	Nil	
Day 2	Silicea 200C, 1 dose	
Day 3	Nil	
Day 4	Silicea 200C, 1 dose	
Day 5	Nil	
Day 6	Calcarea carbonate 200C, 1 dose moring	
Day 7	Nil	
WEEK 9		
Day 1	Ferrum phosphoricum 200C	
Day 2	Calcarea phosphoricum 200C	
Day 3	Kali muriaticum 200C	
Day 4	Calcarea sulphuricum 200C	
Day 5	Natrum sulphuricum 200C	
Day 6	Magnesium sulphuricum 200C	
Day 7	Magnesium phosphoricum 200C	
WEEK 10		
Day 1	Kali phosphoricum 200C	
Day 2	Kali sulphuricum 200C	
Day 3	Kali muriaticum 200C	
Day 4	Natrum phosphoricum 200C	
Day 5	Natrum muriaticum 200C	
Day 6	Calcarea fluorica 200C	

NOTES:

Thuja 1M or 10M is one of the primary Hx of vaccinosis – disease of the vaccines. It can be given throughout the schedule of Ten Weeks as an 'intercurrent' on the Nil days. Especially with a collapse of energy and inflammatory pain. Also, if the sacrum locks up and the hips become rigid and painful to move.

The following sequences are for the symptoms that have been noted for these vaccines:

Motor Neuron Symptoms - Pain, stiffness, lame in the hips, aching muscles, development disability.	
Give 1 dose in this sequence every 3 hours	Calcarea phosphorica 200C, Arnica 200C, Ruta 200C, Graphites 200C, Causticum 200C, Bellis perenis 200C, and Vanadium 200C.
Legs: Heavy, sharp pain extending downward.	
	Plumbum 200C or 1M
Legs: Paralysis, stiff.	
	Lathyrus sativa 200C or 1M.
Hips and sacrum lock up	
	Thuja 10M
Cardiac – to help the heart	
	Magnesium sulph 200C, Natrum sulph 200C, Arnica 200C.
	Soak the feet in Epsom Salts
Nerve Inflammation	
	Calendula 10M, Dandelion Root infusion. Cannabis sativa in mother tincture or 12C, Tabacum 12C
5G Nosode -neutralize 5G frequency	
	The graphene oxide in the injection is a super conductor and interactive with 5G frequencies. Good in any potency

Any of these weeks can be repeated – especially as the six-month time frame for the S1 spike protein synthesis and cytokine storm approaches.

* Silicea - The contra-indication of Silicea 200C or 1M is the existence of surgical pins or plates in the body because Silicea in medium / high potency will cause the body to shift out heavy metals. This is why it is effective with removing mercury from the body.

Dosage Explanation – Doses are 3 pills or 5 pills for 1 dose. People think the dose is in the quantity of pills but with homeopathy this isn't the way it works. Homeopathy is actually a nano-technology. When you give a homeopathic you are giving the energy of a substance. So as a dose it doesn't matter if you take 1 pill, 5 pills or the whole bottle of pills - you are still getting the same amount of energy. A dosage of 3 to 5 pills compensates for any weakness in the production and/or home storage of the pills without dramatically increase your purchasing costs. Pills are the easiest for people to buy and store.

Hx Ordering List - This is a list of the Hx in the order they are mentioned in the first protocol provided above.

Arnica 200C	Zincum metallicum 200C or 1M	Calcarea sulphuricum 200C
Thuja 1M	Phosphorus 200C or 1M	Natrum sulphuricum 200C
Tabacum 6C	Phosphoricum Acidum 200C or 1 M	Magnesium sulphuricum 200C
Silicea 200C	Mercurius Solubilis 1M	Magnesium phosphoricum 200C
Canabis sativa 12C	Nosode	Kali phosphoricum 200C
Arsenicum album 200C	Calcarea carbonate 200C	Kali sulphuricum 200C
China officinalis 200C	Ferrum phosphoricum 200C	Natrum phosphoricum 200C
Kali Iodatam 200C	Calcarea phosphoricum 200C	Natrum muriaticum 200C
Graphites 200C	Kali muriaticum 200C	Calcarea fluorica 200C
